

LEARNER NOTIFICATION

Society of Cardiovascular Anesthesiologists

Activity Title: 2024 Thoracic Anesthesia Symposium and Workshops

Date: April 26, 2024

Acknowledgement of Monetary Commercial Support

The following company provided monetary support for this CME educational activity in the form of an unrestricted educational grant: **None**

Acknowledgement of In-Kind Support

The following companies provided in-kind support for this CME educational activity: **Ambu Inc., GE HealthCare Technologies Canada, Diacom, Verathon and Philips.**

Accreditation Statement

The Society of Cardiovascular Anesthesiologists is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The Society of Cardiovascular Anesthesiologists designates this enduring material activity for a maximum of 10.0 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Description:

Annual societal meeting which provides education and research presentations for thoracic anesthesiologists.

Educational Information

Physician Practice Gap:

A gap in physician performance in thoracic procedures, lung ultrasound, regional anesthesia and knowledge base in thoracic anesthesiology will be addressed. This conference addresses several current gaps in thoracic anesthesiology: communication and teamwork in the thoracic surgical workplace, professional advancement of anesthesiologists into leadership positions and in academia, advanced procedures and point of care ultrasound technique, and up to date clinical information and best practices in thoracic anesthesiology practice.

Needs that Underlie the Gap

There is a need to provide clinicians with new approaches, strategies and updated practice guidelines and data to better diagnose and treat patients with thoracic pathologies as well as those undergoing major thoracic surgery. In addition, there is also a need to provide education to

clinicians on how to prevent, identify, diagnose and treat a variety of issues and complications associated with the field of thoracic anesthesiology.

DESIGNED to Change/Outcome: Following this activity, learners will develop competence by increasing their knowledge through a combination of hands-on learning, case-based presentations, and online lectures. Knowledge will be assessed with a pre-test and post-test.

The combination of in-person demonstrations, didactic lectures, case-based panel discussions and clinical dilemmas which demonstrate the broad clinical utility of perioperative echocardiography, participants will be able to improve on all the competencies mentioned above by gaining knowledge on new practice guidelines and new technologies, as well as observing and participating at discussions in multidisciplinary panels with case -based presentations.

Educational Objectives

After completing this activity, the participant should be better able to:

- Describe the latest advances and research in thoracic anesthesia.
- Identify current trends in clinical and bench research pertinent to the perioperative care of patients undergoing thoracic surgery and incorporate this knowledge into understanding of the science of thoracic medicine.
- Evaluate new therapeutic techniques and diagnostic/interventional procedures in thoracic anesthesiology.
- Discuss advances in procedures related to thoracic anesthesia including regional anesthesia of the chest wall.
- Acquire skills necessary for career progression in thoracic anesthesia.

Satisfactory Completion

Learners must complete an evaluation form to receive a certificate of completion. Partial credit of individual sessions is not available.
