

Beginning a Mentoring Relationship

Welcome to the SCA [Call for Mentors!](#)

Mentors provide a valuable source of advice and guidance and will reap rewards of expanding their professional networks and building collaboration. The program consists of the following:

- Getting to know your mentee, building a relationship, and establishing needs and expectations.
- Completing a personal faculty assessment, which can provide a very useful link between a mentee's starting point and their eventual goals (assessments will be sent at a later date).
- Discussing your mentee's personal and professional goals and helping them to identify one or two achievable goals and develop a plan.
- Important topics for future communication might include new projects, career development, upcoming deadlines, and personal/professional updates.
- Mentors and mentees will be paired in late March. We will be back in touch in the spring with your match.
- NOTE: This program requires your in-person attendance at the 2025 SCA Annual Meeting in Montreal.
