Dear Friends,

We are delighted to welcome you to the premier perioperative echocardiography conference hosted by the Society of Cardiovascular Anesthesiologists.

In collaboration with the Society of Cardiovascular Anesthesiologists Echo Planning Committee and our esteemed faculty, who are eagerly sharing their wisdom, we've curated an array of multidisciplinary panels. These panels will explore the pivotal role of echocardiography in surgical decision-making, alongside deep-dive sessions that enhance skills in advanced image acquisition and post-processing. We've also arranged heart dissection workshops to enrich your understanding of echo-anatomic correlations, particularly in transcatheter and surgical interventions.

Most of these sessions will be recorded, allowing you to revisit the material post-conference at your convenience. Additionally, for those who prefer remote participation, we will be broadcasting the events live in a virtual format.

As part of your registration, you gain exclusive access to our on-demand Echo Core Series. This series comprises lectures that delve into the essential echocardiographic principles, covering topics from physics to complex procedural overviews, including valvular disease and mechanical circulatory support.

This conference is more than just an educational experience; it's an opportunity to join fellow enthusiasts in the field of echocardiography. Whether you're forging new professional relationships or rekindling old ones, we look forward to the camaraderie and collaboration that await us all.

Enjoy the conference!
